

Pregnancy Counselling Contacts

At some time in their lives, some women are faced with making a decision that they never expected to make. This choice may be straight forward for some, for others the decision may be quite difficult, perhaps the most difficult they will ever make.

Our doctors and staff respect the individual and private choice of every woman and are committed to providing a safe and supportive environment for those women seeking termination of pregnancy. The key goal of pregnancy counselling is to encourage you to make your own personal decision and feel comfortable with the decision you have made. Counselling is also designed to limit regret and long-term psychological consequences by exploring alternatives and resolving ambivalence.

Legally, we are required to know your reasons for pregnancy termination but assure you we provide a non-judgemental atmosphere. Our policy is to provide comprehensive, concise and unbiased information, with each patient being individually assessed and counselled prior to her procedure. We aim to deliver a medical service synonymous to a person seeking medical treatment for any other condition.
